## NEW SubliJet-R System for RICOH GX7000

Specific to the new Ricoh GX7000 is a new formulation of SubliJet-R. Unlike any other sublimation ink, SubliJet-R for the Ricoh features a higher viscosity designed to work exclusively with the Ricoh print head. The four-color ink configuration (cyan, magenta, yellow, and black) uses two sizes of cartridges - 68 ml black and 60 ml color. Additionally, Ricoh GX7000 users are covered by PartnerPlus - Sawgrass' comprehensive technical support program.

Touting fast printing speeds, energy efficiency, high-capacity output, and brilliant color output, the Ricoh GX7000 offers a new choice in sublimation printing. Accompanied by PowerDriver-R, the Ricoh GX7000 system features easy color management and images with sharp details. The professional-grade system touts a larger printing area up to 11 x17".
