5818-5821 Signs of Life Collection Sales Sheet

Signs have been around since the beginning of civilization. One can say that cave man drawings are signs. Signs naturally fulfill the needs of:

- Communicating a business's products and services
- Communicating what one's interests are
- Commemorating an event in one's life.

But it's not till now that one can use all of today's tools to make top-shelf, full color, personalized signs for many applications. Unisub has done just that with the launching of their Signs of Life Collection. The blanks are made from .25 thick tempered hardboard Unisub 90 Gloss, shaped using state-of-the-art industrial lasers, and arrive packed out with plastic peel & stick hangers. You can chose from four shapes to add a personalized touch to your customer's home or office or start with a Starter Kit with graphics on a CD. Templates and graphics can also be downloaded on unisub.com.
